## Mobile Applications ....................................... 21
No longer do thermal binoculars need to be expensive and clunky. The Thermal BinoX is here to provide you with unprecedented capabilities at a fraction of the cost. Well designed, ergonomic and sporting a professional 50 mm germanium lens, the Thermal BinoX is a pleasure to behold.

Powered by the powerful Obsidian “TII” Core the Thermal BinoX comes in both 384x288 and 640x480 configurations to provide sharp and clear images. Like the rest of the Smart HD series of optics, the Obsidian “TII” core utilizes a slew of sensors to seamlessly gather information about your environment. Record video and capture photos directly to your microSD card or stream them to your mobile device through the built-in Wi-Fi. The Thermal BinoX comes with more features than you will know what to do with at first, but soon you won’t know how you lived without them.

* ATN reserves the right to change the above specifications at any time without notice
PREPARING THE DEVICE

UNPACKING
The following steps must be accomplished prior to each mission where the device is used:
1. Open packaging box, remove Thermal BinoX-THD and check the contents
2. Make sure that nothing is missing
3. Inspect the device for damage to optical surfaces, body, eyecups, operation buttons, etc.
4. Ensure that all optical surfaces are clean and ready for use.

NOTE
If any accessories are missing or broken contact ATN’s Customer Service.

INSTALLATION OF BATTERIES
The Thermal BinoX-THD will operate on three CR123 type batteries.

NOTE
We highly recommend using lithium CR123 batteries. They will provide much longer battery life.
Install batteries as follows:
1. Remove the Battery Cover following the arrow direction
2. Insert batteries as shown.
3. Close the Battery Cover.

NOTE
Make sure that the device is turned off before changing sources of energy (batteries or USB in power supply mode).

MicroSD, USB AND HDMI PORTS
The device is equipped with microSD, Micro USB and Micro HDMI ports. You can find them under the rubber cover (we marked the cap with appropriate icons).
To open the cover you should gently lift the rubber cover and move it out of the way.

NOTE
Make sure that the device is turned off before inserting the microSD card into the slot.
1. A new card should be formatted before usage.
2. Insert microSD card as shown.
3. To lock the card in the slot push it in with a thin object (a small coin, paper clip, toothpick, etc.).
4. Return the cover to its original position.
NOTE
There is only one correct direction to insert the microSD Card.
Do not force the card into the slot as it may damage both the device and the card itself.

To remove the microSD Card from the slot, push it in using the same thin object. When it pops up a few millimeters, it can be pulled with your fingers or tweezers.

NOTE
If you are going to record video we recommend using a Class 10 microSD card (10 MB/s) or faster and have capacity from 4 to 64 GB.

FIRMWARE UPDATE
Before operating your device please update the firmware to the latest version.

To receive a notification of new firmware updates, please register your device on our website (you’ll receive an email letting you know when new firmware becomes available).

To update the new firmware you will need a microSD Card and batteries that are fully charged.

NOTE
In the event of a power failure during an update the device may crash corrupting its system files and will need to be sent back to the ATN factory for service. It is important not to use additional sources of power during firmware update!

Update the new firmware as follows:
1. Download the ***.bin file from https://www.atncorp.com/firmware (You may need to create an account, if you didn’t create it earlier) and copy to your microSD Card — root directory.
2. Insert the card into the device.
3. Turn ON the device.
4. In the “Firmware Update” dialog box select “Yes” to start the update.
5. When the update counter reaches “100%” the device will automatically restart.
6. Once the device is powered up it will enter self configuration mode.
7. After completing it will automatically restart and will be ready for use.
8. Motion Sensing platform will be configured when first turned on.
9. Once the Firmware update completes, please do a factory reset before using the product.
10. Please remember to delete the Firmware File off of the microSD card after all steps are completed.

NOTE
If the device does not restart within 30 seconds, remove and re-insert the batteries and power-up the device.

Once the device has been updated you will need to either format the card or delete the update file manually. In the event you do not, the system will ask you if you wish to update the device every time you turn it on.
ON/OFF

To TURN ON the device press and hold the POWER button until you see the ATN splash screen.

To TURN OFF the device press and hold the POWER button, until the dialog box “Shut down the device?” appears. Choose “Yes” to turn off.

**NOTE**
Upon startup you must perform a NUC.

USING YOUR KEYPAD

The KEYPAD is programmed to be used in two different ways:

- Short and Quick Taps — used for most functions and to get around the menu;
- Press and Hold — designed to be used in the following situations — ON/OFF, ZOOM, SHORTCUT MENU.

**NOTE**
Using LEFT or RIGHT buttons in the menu, lets you quickly Exit Shortcuts from any position.

FOCUSING

DIOPTER ADJUSTMENT

By rotating the Diopter Adjustment Ring you will achieve optimal sharpness for your vision. Look through the eyepiece while focusing on the interface on the screen.

Do not take the rubber cap off the objective lens.

**NOTE**
You should not need to re-adjust the Diopter Adjustment unless another user with different vision than yourself will be using the device.

INTERPUPILLARY ADJUSTMENT

Depending on the distance between your eyes, you may adjust the individual eyepieces by moving each one horizontally.
MOUNTING ON A TRIPOD

The BinoX THD is tripod mountable and can be mounted on tripods with a 1/4” thread mount.

COMPASS CALIBRATION

When the compass needs to be calibrated the word “CAL” appears instead of the Compass Scale. To calibrate you should rotate the device on three axis as illustrated.

NOTE

After calibrating the device please remember that the compass will work best when holding the BinoX-THD parallel to the ground.

Other possible Errors:
• ERR — an error was detected (you may need to restart the device or recalibrate the compass);
• SMF — your device is under Strong Magnetic Field (please, move away from the Magnetic Field);
• UPD — your firmware needs to be updated.
HOMESCREEN

First screen you’ll see after switching on the device is Homescreen. It consists of Scales, Status Bar icons and different Informational Widgets.

SCALES
E-Compass Scale shows yaw angle based on e-Magnetometer data. Roll Scale shows binocular cant based on internal 3D Gyroscope. Pitch Scale shows binocular inclination based on internal 3D Gyroscope.

STATUS BAR
Its job is to display information about the current state of the system. Currently inactive icons become invisible, so you will only see the important information on the Homescreen Interface:
• Battery — appears when energy level is low
• SD Card — shows the presence or absence (red icon) of memory card
• Bluetooth, GPS and WiFi — show when the function is enabled.

WIDGETS
They are interface elements which provide quick access to useful information. There are several types of widgets:
• Icons without value — are used for mode displaying (Photo and Video Modes)
• Only numerical value (Detailed Roll and Pitch Values)
• Icons with a numerical value which provide detailed numerical readings
• Photo Preview (appears in the bottom of the homescreen, after the photo is taken).
Display widgets can be disabled from the System Menu.

To get to the System Menu you should click on the CENTER button from Homescreen and access the Shortcut Carousel.

Then select the wrench icon with RIGHT or LEFT buttons and push CENTER button to enter the menu.

Select Display tab with RIGHT button and choose subcategory Display Widgets with DOWN button.

**MAIN OPERATIONS**

![ZOOM LEVEL](image)

**ZOOM LEVEL**

By pressing and holding the UP or DOWN button on the keypad you will be able to Zoom IN and OUT.

Current Zoom Level is displayed in the Zoom widget on the Homescreen.

![TAKING PHOTOS](image)

**TAKING PHOTOS**

Press the LEFT button to TAKE A PHOTO.

Depending on the selected mode, you will make one or several photos. You can choose from various photo modes in the System Menu.

![VIDEO RECORDING](image)

**VIDEO RECORDING**

By pressing the RIGHT button you will be able to RECORD VIDEO.

**NOTE**

Your recording will automatically stop when the memory card is full or the battery is out of power.

![SHORTCUT CAROUSEL](image)

**SHORTCUT CAROUSEL**

The CENTER button opens the menu and closes it down when pressed again.
SHORTCUT CAROUSEL

The Carousel is your access to a number of Shortcuts that allows you quick access to additional features. Just click on the CENTER button from Home-screen to access the Carousel.

Buttons highlighted in Red are the only ones that activate a particular shortcut.

Movement between the items is carried out using the LEFT & RIGHT buttons, except the group of ON/OFF switches (WiFi, GPS).

You should use the UP & DOWN buttons to switch modes.

To turn ON or OFF a particular switch you should click the CENTER button while having the switch selected. Example — WiFi.

EXIT
Exit Carousel.

NUC
The shortcut allows to make non-uniformity compensation (NUC). NUC’ing is required to improve image quality when the image is degraded by various environmental events. Example: Change of temperature, continues viewing of a particular warm object, movement from one environment to another all may cause image degradation. To clean up the image you will need to press the NUC shortcut while closing the objective lens with a solid object (lens cap, hand, book, etc.).

RANGEFINDER
Activates Smart Rangefinder feature.

GALLERY
Gives you access to the library of Images and Videos that are stored on your unit’s SD Card.

WiFi module – Turn ON/OFF WiFi.

GPS module - Turn ON/OFF GPS.
SYSTEM MENU
Allows for access to various system options and adjustments.

USING SYSTEM MENU

To enter the System Menu you should open Shortcut Carousel with CENTER button and select the wrench icon with RIGHT or LEFT buttons. Then push CENTER button to enter the menu.

The System Menu consists of a Tab Bar at the top of the screen, list of subcategories in the center and Help Information at the bottom.

On the left side of the Tab Bar you will find the Exit (with arrow icon). Pressing it with CENTER button will bring you back to the Homescreen.

Movement between the tabs is carried out using the LEFT and RIGHT buttons. Each tab includes subcategories. To select a particular subcategory you should use the UP and DOWN buttons and press CENTER button.
To change a particular value you should follow the next few steps. Select the subcategory you need with the UP or DOWN buttons.

Press the Center button to select a particular value (once selected it will turn red).

Change the value with the UP and DOWN buttons.

To select a new value press CENTER button to confirm the change.
PHOTO AND VIDEO MODES

Press the LEFT button while staying in Homescreen to TAKE A PHOTO.

You must have a microSD card inserted in the device for these features to work. All files will be stored on the microSD card.

Depending on the selected mode you will make one or several photos. You can choose from various photo modes in the System Menu.

To enter the System Menu you should open Shortcut Carousel with CENTER button and select the wrench icon with RIGHT or LEFT buttons.

Then push CENTER button to enter the menu.

There are three photo modes to choose from. Switching between modes is done in the System Menu from Photo/Video tab, subcategory Photo Mode.

Use UP or DOWN buttons to switch between modes. Press the CENTER button to select a particular value (once selected it will turn red).

NORMAL

This default mode allows you to take one photo at a time.

TIME LAPSE

Time Lapse is where the device takes a sequence of images of a subject with an interval of time between each image.

The interval and the number of photos taken can be changed in the System Menu.
To make changes choose the Photo/Video Tab in System Menu, then use UP or DOWN buttons to select Time Lapse Settings.

Press the CENTER button to enter the mode settings. While you are in this mode, the Time Lapse widget appears.

**BURST**

Burst mode captures a series of photos.

You can select the best image of the group or arrange them in a sequence to study the transitions in detail.

The number of the photos taken can be changed in the System Menu. While you are in this mode, the Burst widget appears.

Regardless of which mode you are using the preview appears after a photograph is taken on the bottom of the screen for several seconds.

If you press the RIGHT button to Start Video recording. Press RIGHT button again to stop Video recording.

**NOTE**

*In extreme wind conditions we recommend turning the Microphone OFF.*

You can turn on the microphone and switch the quality of the video in the System Settings (Photo/Video tab).

To enter the System Menu you should open Shortcut Carousel with CENTER button and select the wrench icon with RIGHT or LEFT buttons.
Then push CENTER button to enter the menu.

You must have a microSD card inserted in the device for these features to work.

All files will be stored on the microSD card. Recorded videos can be found in the Gallery of the device.

While recording the Counter widget and Time Stamp appear.

RANGEFINDER

Using the Smart Range Finder you will quickly be able to estimate the distance to your target as long as you have reasonable knowledge of the size of your target.

RANGEFINDER

To use select the Flag Icon from the Shortcut Carousel.

Pressing the CENTER button will take you to the Main Screen of the Rangefinder feature.

To measure the distance, follow the next steps:

- Put the arrow-mark on the top of the target and press the CENTER button, wait for the binocular to take the readings (it will take a number of readings so try to keep your binocular steady);
- Put the arrow-mark under the target and press the CENTER button;
- If satisfied with the value press the LEFT button to go back to the Homescreen or repeat steps 1 and 2 if necessary.
NOTE
During the measurement process, you can zoom in and out using standard buttons (UP and DOWN).

If the Target Height is incorrect you can change it:

- Press the RIGHT button to enter the Menu;
- Choose one of the presets or input the height manually;
- Accept the height with CENTER button and go back to the Main Screen.

HOW TO PERFORM A NUC

NUC’ing is required to improve image quality when the image is degraded by various enviromental events.

There are multiple NUC tables that span the full operating temperature range, and the sensor automatically selects the optimum table based on its temperature.

Example: Change of temperature, continues viewing of a particular warm object, movement from one enviroment to another all may cause image degradation.

To clean up the image you will need to press the NUC from the Shortcut Carousel while closing the objective lens with a solid object (lens cap, hand, book, etc.).
PIXEL CORRECTION PROCEDURE

Pixel Correction Procedure is intended to correct “neutral” pixels that are visible in the FOV, but are not responding to the changing environment or scenery. They may be white or black and remain static and or nonresponsive.

1. Enter the Carousel by pressing the CENTER button.
2. Select System Settings.
3. Select Thermal Category.
4. Select Pixel Correction Subcategory.
5. Select Manual Correction.
6. You should see a targeting reticle, use the key pad to move the reticle over the neutral pixel. If it is hard to target the neutral pixel, press the CENTER button and select Zoom. Use the UP and DOWN buttons to zoom in and out on to the neutral pixel in order to isolate it. Once you have isolated the neutral pixel, press the CENTER button to escape from the zoom function.
7. Once the reticle is positioned over the neutral pixel, press the CENTER button and select Save. This should correct the pixel.

**NOTE**

*If after you have done the procedure outlined above and the neutral pixel has not been corrected. Try the process on a pixel directly adjacent to the neutral pixel in order to make a uniformed correction in the FOV.*
THERMAL

INVERSE HOT — swap the appearance of coldest and hottest color.

PALETTES — the range of colors used in displaying.

CONTRAST — the difference in luminance and color that makes an object more distinguishable.

PHOTO/VIDEO

PHOTO MODE — includes Single (capture a single photo), Time Lapse (series of photos at timed intervals) and Burst (up to 10 photos in one second) modes.

BURST COUNT — amount of photos in one second (2 – 10).

TIME LAPSE SETTINGS

• Total Photos — amount of photos in a series (2 – 10).
• Frame Interval — length of the interval (2 – 15 sec).

MICROPHONE — sound recording (ON/OFF).

VIDEO QUALITY — can be 1280x960 @30 fps

FORMAT SD CARD — after you choose this subcategory you’ll see a pop-up window asking you about formatting.

NOTE

Remember when formatting your microSD card you will lose all information on it, including photos and videos.

DISPLAY

SCREEN BRIGHTNESS — 1-5 with 1 being the dimmest and 5 the brightest. It is recommended that you use the brightest setting during the day for optimal performance.

DISPLAY WIDGETS — allows you to disable several widgets (Minimal/Extended).
SLEEP MODE
Sleep mode is activated when your device is not in use for a set period of time (example: 1 – 60min). During sleep mode the display and some of the sensors will be inactive. To get out of Sleep mode and get back to normal operations just physically move the device or press any of the buttons.
• Mode — allows you to switch the mode (ON/OFF)
• Hibernation Time — can be 1 – 60 min

SETTINGS

UNITS — can be Metric or Standard system.

DATE AND TIME
• Clock Source — allows you to choose different types of sources to improve the accuracy (Manual, WiFi or GPS).
• Date Format — can be YYYY-MM-DD, MM-DD-YYYY, DD-MM-YYYY.
• Time Format — form of stating the time (24-hour or 12-hour).
  • Date — enter the date.
  • Time — enter the time.
  • Time Zone — allows you to choose a geographical region with standard time.

WiFi — values are not changeable.
• SSID
• Password
• MAC Address

RECORD GEO-TAGGING — adding geographical identification to your videos (ON/OFF).

ZOOM — allows you to choose different types of zoom (Standard, Extended). Extended Zoom will give an electronic zoom of 10x to your optical Zoom.

However, we would like to caution you that you will begin to see considerable pixelation at such a zoom.

RESTORE FACTORY SETTINGS — allows to reset all the settings to default.

FIRMWARE VERSION — allows you to see the firmware version currently running on your device. We recommend that you register your product on our Update Center (www.atncorp.com/firmware) in order to make sure that you are getting emails when new firmware versions become available. We are constantly working on new features, functions, and improvements that we provide to you free of charge via firmware upgrades.
SERVICING

WARNINGS AND CAUTIONS

• Always remember to turn off the device when it is not in use. If you do not plan on using it for a period of more than 10 days, you should remove the batteries.
• Do not disassemble, drop, open, crush, bend, deform, puncture, shred, microwave, incinerate, paint or insert foreign objects: it will void your warranty.
• Keep Lens Cap on when not in use.
• Avoid contact with dust, steam, and gas.
• This product contains natural rubber latex which may cause allergic reactions.
• The device is a precision electro-optical instrument and must be handled carefully.
• Do not scratch the external lens surfaces or touch them with your fingers.

CAUTION

Failure to follow these safety instructions could result in damage to the device!

MOBILE APPLICATIONS

By utilizing the ATN Obsidian app., you can control your device and view live streaming. Connect a phone or tablet and view everything simultaneously.

Want to see what you’ve recorded so far? No problem, once connected to the app. via WiFi, open up the Gallery and playback your latest adventures. All your photos and videos are right at your fingertips.
